FACILITIES PLANNING

FACILITIES PLANNING

WASB CODE: 920

The District will use both short- and long-range planning as it relates to the facilities of the District. The District Administrator or designee shall submit for Board consideration plans for facilities improvement, additions, maintenance and construction.

Facility plans may be modified to conform to changes in the curriculum, availability of funds, expansion of territory to be served and changes in enrollment.

The Board believes that whenever possible, parents and other community representatives as well as teachers, support staff, administrators, and students should be involved in the planning process.

The District will utilize the latest and best information and ideas regarding educational facilities within the District, with a view to achieving the District's central purpose of high-quality education.
